**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art of record (for example US 6055013 A, figures 24-26) teaches a 2D/3D switching type liquid crystal display panel capable of 2D display and 3D display, comprising: display image generating means for generating an image in accordance with input image data [SLM2]; parallax barrier means for rendering a certain viewing angle to a display image during 3D display, so as to provide a 3D effect [72]; and switching means for switching 2D display and 3D display by activating and deactivating the effect of the parallax barrier means [74]. The prior art of record (for example JP 04-296825) also teaches two liquid crystal cell wherein one cell is larger than the other cell in order to reduce parallax. The prior art record does not teach nor suggest, in combination with the limitations supra, the parallax barrier means and the switching means respectively having wider active areas than an active area of the display image generating means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
